VERTICAL SLIDER

The new **Vertical Slider** from **Consort** is a modern vertical sliding sash window that combines classic, elegant detailing from the Georgian era with the very latest production techniques and technologies.

The cutting edge design incorporates modern low line beads, enhanced weather protection and inward opening sashes that allow easy cleaning.

It is a stylish window that offers strong, secure build with incredibly low maintenance and thanks to the innovative aluminium security bar it is one of the securest vertical sliders available.

And as you would expect from a company with over twenty years experience, the vertical sliding sash window complies with the building regulations concerning thermal efficient glass.

For further information on the new sliding sash window, please contact the sales team on **01623 440 880**
